**Exhibit 15***Cisco Systems, Inc. v. Arista Networks, Inc.*, Case No. 5:13-cv-5344-BLF (NC)**Note:**

1. Listed below are the 198 commands that (1) were registered more than five years after first publication and (2) whose alleged authors were never deposed. The information contained herein is taken from Cisco's Responses to Arista's Interrogatory 16, Exhibit F, and Exhibits 3–28 of the Second Amended Complaint.
2. Cisco has not identified exactly where each command appears in its registered works in response to Arista's Interrogatory 25. Arista has thus assumed that each command appears in the first registered version of Cisco software that post-dates that command's first publication. In some cases, that may not be true, which means that the number of commands that Cisco did not timely register could grow. Cisco's response to Interrogatory 25 is subject to a Motion to Compel pending before Judge Cousins.
